Your Advantage.
And Then Some.

And Then Some Philosophy

We strive to uphold our *And Then Some* company culture to continually exceed customer expectations. We are recognized on local, state, and national levels for technical excellence, business ethics, and quality. Being a solutions provider, our employees are our greatest asset. We focus on providing our employees with an environment where their passion for their work, innovative solutions and their *And Then Some* work ethic is fostered.

Air Defense Weapons Systems Reset and Support Equipment

ASI has touched every short range air defense unit both CONUS and OCONUS. Since 1999, ASI has provided inspection, rehabilitation and modification of assigned assets for systems including Avenger, Linebacker, Kiowa Warrior, MANPADS, SLAMRAAM, and Sentinel systems. ASI personnel have provided support to active Army, National Guard and Homeland Security units.

Prototyping and Repair

Project Manager, Cruise Missile Defense System – Air Defense Project Office

ASI personnel have the responsibility for repairing the equipment soldiers deploy with to combat. The ASI Team services and overhauls the M3P machine gun at the ISO 9001:2000 certified Maintenance Operations Procedures Prototype (MOPP) Shop. In addition, ASI's Avenger Readiness Assistant Support Team (ARAST) maintains and services the unit's equipment while it is deployed. ASI also duplicates problems that soldiers are encountering in the field, and finds solutions for those problems. Depot level maintenance on Interface electronic assemblies (IEA)s and launcher electronic assemblies (LEA)s is also conducted. Maintenance previously requiring three to six months has been reduced by ASI to one week for each IEA or LEA, resulting in significant cost savings.

Integrated Logistics Support

U.S. Army Product Director – Test, Measurement and Diagnostic Equipment (PD TMDE)

ASI provides subject matter expertise in maintenance planning, supply, and precision maintenance equipment support. ASI develops, tests, and analyzes technical data for automated test equipment tactical platforms, workstations, and automated test procedures. ASI provides total package fielding services for Army tactical systems and components to include new equipment training.

Property and Supply Management

U.S. Army Product Director – Test, Measurement and Diagnostic Equipment (PD TMDE)

ASI manages warehousing facility operations for the temporary storage of high value electronic and mechanical test equipment during the development, production, and materiel fielding phase of the acquisition lifecycle. ASI also provides packaging, handling, storage and transportation coordination for Army test, measurement, and diagnostic equipment end items, components and associated items of equipment.
